ROLLER BLINDS

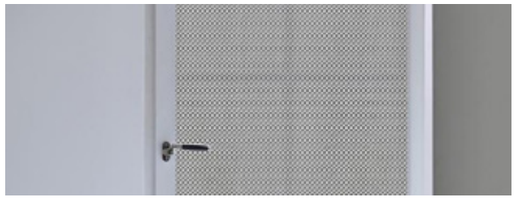

Controlled lighting. Open views. Modern styles. Sleek design. On trend textures, colours and fabrics.

Inspired by the global trends in fabric, design, fashion and textiles, the new Taylor Blinds extended collection boasts over 100 different elegant fabrics. The collection includes classic cotton- and linen-look fabric textures that create a balanced and calming atmosphere as well as functional screens that are perfect for light management and heat control.

ROLLER BLINDS FINISH OPTION GLOSSARY

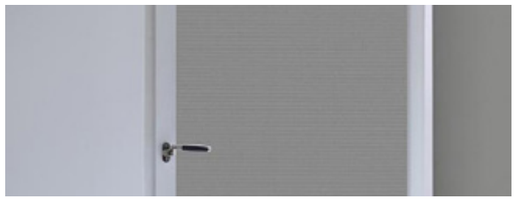

Light Filtering fabrics are sheer and allow the maximum amount of light in. They create a decorative atmosphere and filter light in a soft, beautiful and natural way. There are different types of light filtering fabrics: **transparent** versions don't have an acrylic coating whereas **translucent** fabrics do have acrylic coatings. Translucent fabrics are more sheer.

Screen fabrics allow in plenty of light – yet protect you, your flooring and furniture from UV rays and glare. They are wonderful as energy-saving blinds as they maintain a temperate climate in your room. They provide a great level of privacy during the day, however the opposite is true at night. Screens combine function and beauty: with their functional properties and architectural look and feel, screens are perfectly suited to large windows.

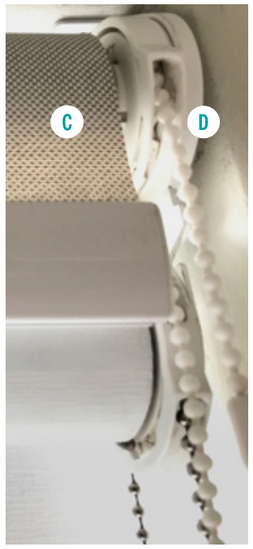

Dim Out blinds are 90% Block Out. They impede the view from both inside and outside. Dim Out fabrics beautifully filter the sunlight, while still creating a diffuse light in the interior. These blinds are often used in kitchens, living rooms and dining rooms. Dim Out blinds let a small amount of light in. The material is not too thick or thin as there is only one solid coating layer on the back (versus Block Out, which has three).

Thanks to their coating on the backside, Block Out roller fabrics completely **Block Out** light, which makes them perfect for the bedroom, boardroom or nursery room. Select between various fabric finishes to complement your décor; and your **choice of PVC or PVC-free** fabric properties.

Le Reve Pewter Blackout

Weight:	430g/m^2
Thickness:	0.55mm

AVAILABLE COLOURS*

Coal Nickel Tin Silver Pearl Gold

SHEERWEAVE SCREEN

Our Sheerweave fabric is a revolutionary screen, manufactured using DOW ecolibrium bio-based plasticizers, rather than fossil-fuel based plasticizers. DOW ecolibrium does not detract from the screen's appearance or performance, and provides a sustainable green alternative to traditional screens, without a PVC fragrance. The application of this treatment also means it will protect and defend your fabric against bacteria, mould, fungi, yeast and algae.

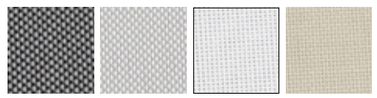

TECHNICAL FEATURES

- Low Carbon Footprint
- Good UV Control
- Glare and Heat Reduction
- Easy to Clean
- Flame Retardant
- Automated or Manual

TECHNICAL SPECIFICATIONS

Opening Factor:	5%

VENETIAN BLINDS

Versatile and practical, our collection features Aluminium, Styro-Wood, Bamboo Wood, and Wood versions. The beauty of Taylor's Venetian Blind Collection is timeless and sophisticated. Bold, natural and neutral tones add a tranquil and welcoming touch to any room, framing your windows and providing shade when needed. Control the lighting, your privacy and your view with these chic, durable blinds.

WOODEN VENETIAN BLINDS

The beauty of Taylor's Wooden Venetian Blind Collection is timeless and sophisticated, a true classic taste for all seasons. These popular blinds add warmth and contemporary flair to your room or space, letting nature in to work her magic.

The natural material and neutral tones of Taylor's Wooden Venetian Blinds add a tranquil and welcoming touch to a room, framing your windows and providing shade when needed. The streamlined design adds simplicity to window dressings and a classic, contemporary feel. The blinds are durable and versatile.

Taylor's Venetian Wood blinds are made from wood sourced from renewable plantations in the Far East. The 50mm slat blinds are available in a variety of subtle hues, colours and textures.

STYRO-WOOD VENETIAN BLINDS

Versatile and practical. The wood-substitute Venetian blind, Styro-Wood, is made from a polystyrene resin base and offers the benefits of a wood-look and feel but without the negative characteristics that come with natural wood (e.g. warping, fading). This style of blind is therefore an ideal choice for bathrooms, kitchens or damp areas.

Styro-Wood Venetian blinds are available in a 50mm slat.

TECHNICAL FEATURES

- Easy to Clean
- Easy to Pull Up
- Cords, Tapes, Head and Bottom Rails are Colour Co-ordinated
- Styro-Wood Range is Suitable for use in Damp Areas (e.g. bathrooms)

AVAILABLE COLOURS*

BAMBOO WOOD VENETIAN BLINDS

Inspired by nature. Perfected by Taylor. Taylor's Bamboo Venetian Blinds are perfect for creating a serene and nurturing environment with a touch of strength and elegance. Bamboo Wood Venetian Blinds offer many unique design benefits: they lend elegance to almost any room décor and their durability makes them reliable as they fulfil the functions of the traditional blind with little to no maintenance.

Bamboo Wood Venetian Blinds are eco-friendly and this, many agree, is a big part of the natural ambiance that bamboo blinds lend to a room. The natural elements of bamboo make it a perfect material for use in the manufacturing of window covering products. They are deceptively durable and can withstand sunlight for extended periods of time.

TECHNICAL FEATURES

- Can be Fitted to any Window or Door
- Easy to Clean and Easy to Pull Up
- Cords, Tapes, Head and Bottom Rails are Colour Co-ordinated
- Made from Natural Materials
- Bamboo has a Special UV Protective Coating

VERTICAL BLINDS

The simplicity of Taylor's Vertical blinds creates a chic and trendy window dressing and are especially popular in offices and contemporary homes. The popular choice for chic and trendy office environments, Vertical Blinds are back in fashion for home décor too. They work with any size window or patio door – parting left, right or splitting evenly on either side – and their perfect straight lines allow you to control the light that enters a room, your privacy and your views.

They are easy to clean and offer excellent insulation against heat and cold. The washable fabric strips are available in widths of 90mm and 127mm and you have a variety of colours and textures to choose from, including a total Block Out PVC option. Our patented stainless-steel rods will not corrode, and guarantee years of trouble-free service.

MOTORISATION

Designed to provide convenience, comfort and energy savings, Somfy's automated solutions are an important enhancement for homes and commercial buildings. At the push of a button, or automatically, they will open or close, providing shade and privacy.

Motorised blinds add a level of ease and convenience with the touch of a single button.

Blinds are an essential addition for home and office as well as for energy savings. Your windows release a lot of the temperature from within a home or office building – heat in the winter and coolness in the summer. Electric motors for interior shades or blinds are easy to operate and work smoothly to keep your window coverings beautiful and functioning longer.

DESIGNED FOR SILENCE AND COMFORT somfy

YOUR RESPONSE TO COMMERCIAL BUILDING REQUIREMENTS

For design-inspired, sustainable architecture with bioclimatic façades performance are the driving forces behind our product development processes.

Sonesse® motors are compatible with Somfy's bioclimatic façade management systems. They act as automatic, intelligent filters that adjust the amount of natural light let in without affecting noise levels.

BENEFITS:

> Improved thermal & visual comfort
> Reduced maintenance costs

SOMFY CONNECTED SOLUTIONS ACCESSIBLE TO ALL

A FULLY CONNECTED HOUSE - THE 3 KEY FUNCTIONS OF THE APP

OPENING

> Multi equipment: over 100 devices by Somfy are compatible with TaHoma

> Multi-brand: connected home devices and appliances from the major brands are compatible with TaHoma

INTUITIVE

> Customised interface

> 3 intuitive menus

- Scenario: to create connected life moments
- Agenda: to live in line with your desires
- Smart: to define advanced programming (sensors, detectors, clock, etc.)

SIMPLICITY

> Simple to install: each device added without reconfiguring the system

> Easy-to-use

Explore a new way to control the solar protection devices. Just by using a smartphone, Connexoon Windows RTS application controls our motorised solutions such as interior blinds, in just one click. Intuitive, smart, playful and in keeping with the times, the application offers greater comfort and peace of mind for a better home experience.

CENTRALISATION

One click to open and close all the devices

TIMER

Programming for the equipment at preferred times each day, to simulate presence

AMBIANCE REPLAY

Run programmed ambiances with 1 click. For instance, run the “Film Evening” ambiance to close the sitting room curtains, turn on the lights, and close all the devices
